1. INTRODUCTION	1
1.1 Reason for this guide	
1.2 Interpretation	
1.3 Basic principles of fire safety	
1.4 Legal provisions	
<hr/>	
2. SCOPE /APPLICATION	3
2.1 Scope of the guide	
2.2 Premises to which the guide applies	
2.3 Application of the guide	
2.4 New buildings	
2.5 Equivalent safety	
<hr/>	
3. DEFINITIONS	5
<hr/>	
4. MEANS OF ESCAPE	8
4.1 General	
4.2 Principles of escape route design	
4.3 Travel distance	
4.3 Vertical escape routes	
4.5 Construction of escape routes	
<hr/>	
5. STRUCTURAL FIRE PRECAUTIONS	23
5.1 General	
5.2 Fire resistance requirements	
5.3 Junctions, cavities, ducts and pipes	
5.4 Wall and ceiling finishes	
5.5 Fire-resisting doorsets	
<hr/>	
6. BUILDING SERVICES	25
6.1 General	
6.2 Electricity	
6.3 Natural gas and liquified petroleum gas	
6.4 Space heating	
6.5 Ventilation systems	
<hr/>	
7. FURNISHINGS AND FITTINGS	28
7.1 General	
7.2 Seating	
7.3 Vertical hangings	
7.4 Floor coverings	
7.5 Bedding	
7.6 Miscellaneous	

	Page
8. FIRE DETECTION AND ALARM SYSTEMS	31
8.1 General	
8.2 Requirements for installations	
8.3 Fire procedures	
8.4 Installation, commissioning and certification	
8.5 Maintenance	
<hr/>	
9. FIRE SUPPRESSION	33
9.1 General	
9.2 Automatic fire suppression	
9.3 First aid fire fighting	
9.4 Facilities for the fire brigade	
<hr/>	
10. EMERGENCY LIGHTING AND SIGNPOSTING	39
10.1 General	
10.2 Design, installation and commissioning	
10.3 Routine testing and maintenance	
10.4 Sign-posting of escape routes	
<hr/>	
11. FIRE SAFETY MANAGEMENT	42
11.1 General	
11.2 Fire prevention	
11.3 Management and staff training	
11.4 Emergency procedures and fire and evacuation drills	
11.5 Fire safety instructions	
11.6 Inspection and maintenance of fire safety equipment	
11.7 Maintenance of the building and its services	
11.8 Maintenance of escape routes	
11.9 Liaison with fire authority and assisting the fire brigade	
11.10 Keeping fire safety records	
<hr/>
